Tank Heater Upgrade Kit For MTBR-D-E

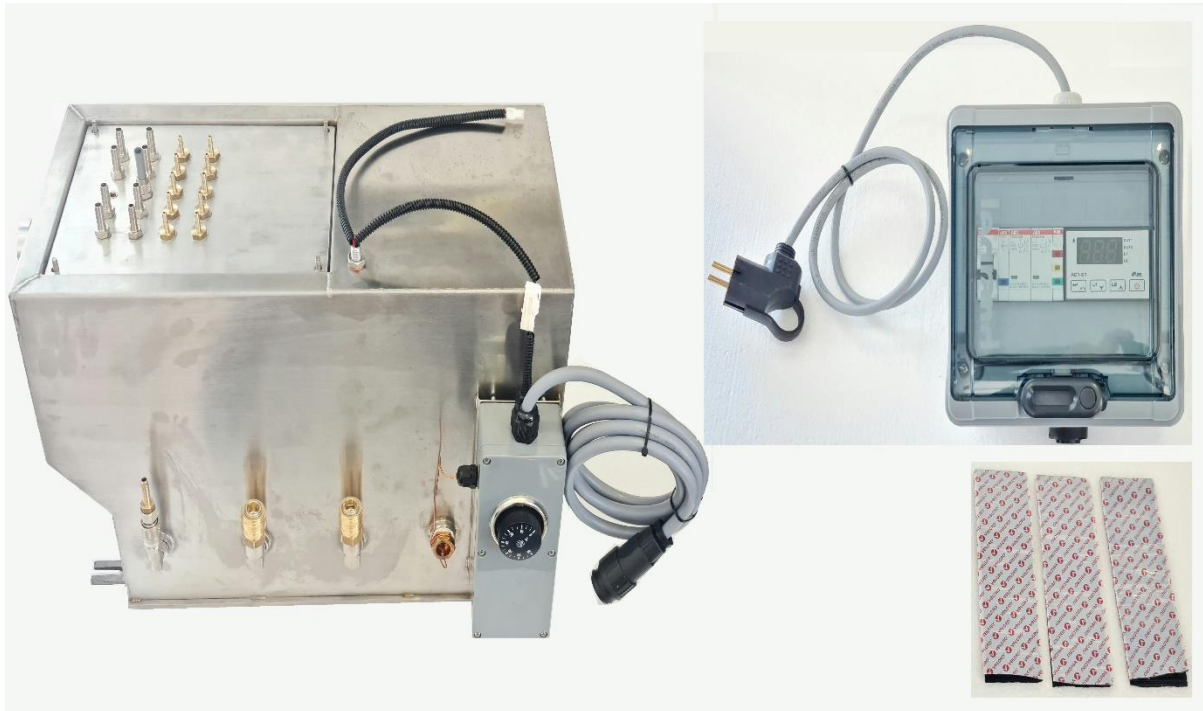

RiD003785

Tank Heater Upgrade Kit For MTBr_E/D

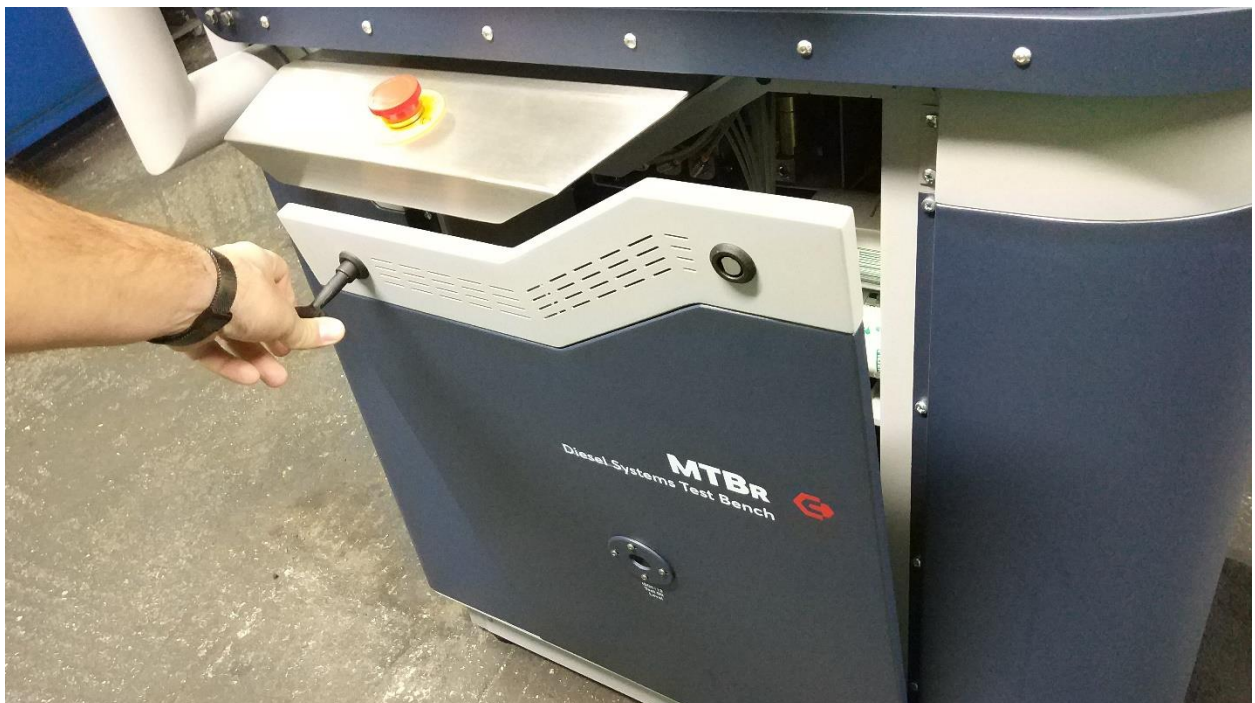

1. Tank Heater CZ007217

Step 1:

POWER OFF and UNPLUG the power from the bench.

Use the special key to remove the side panels.

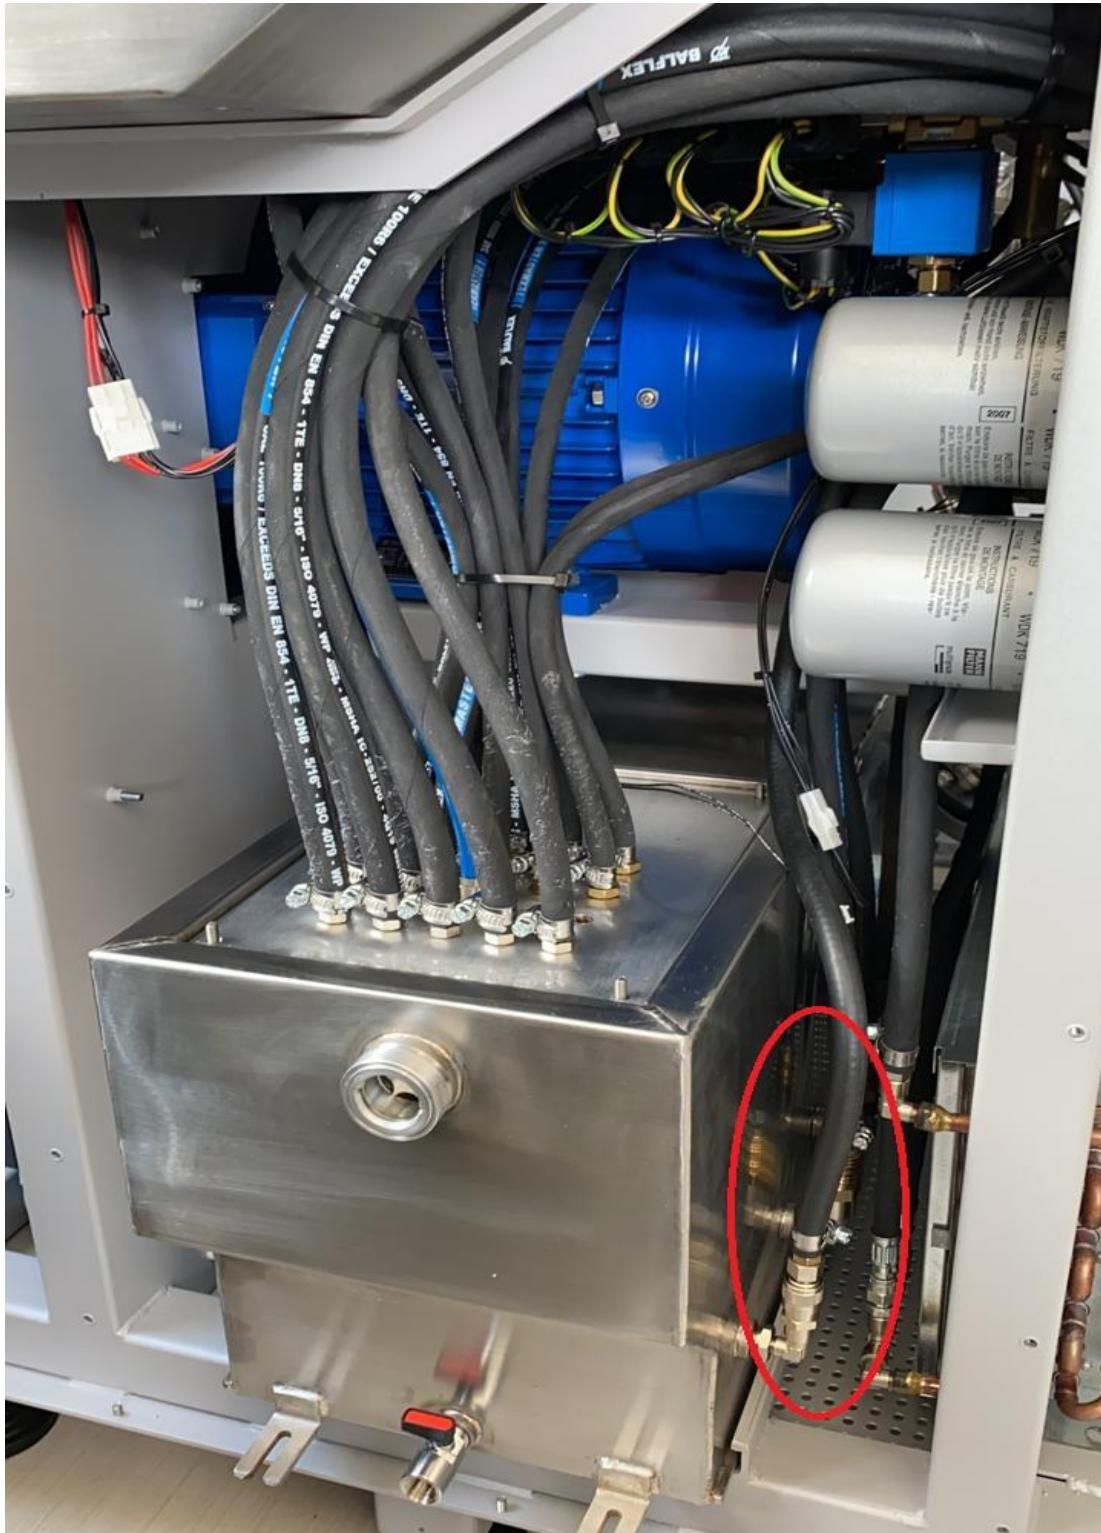

Step 2:

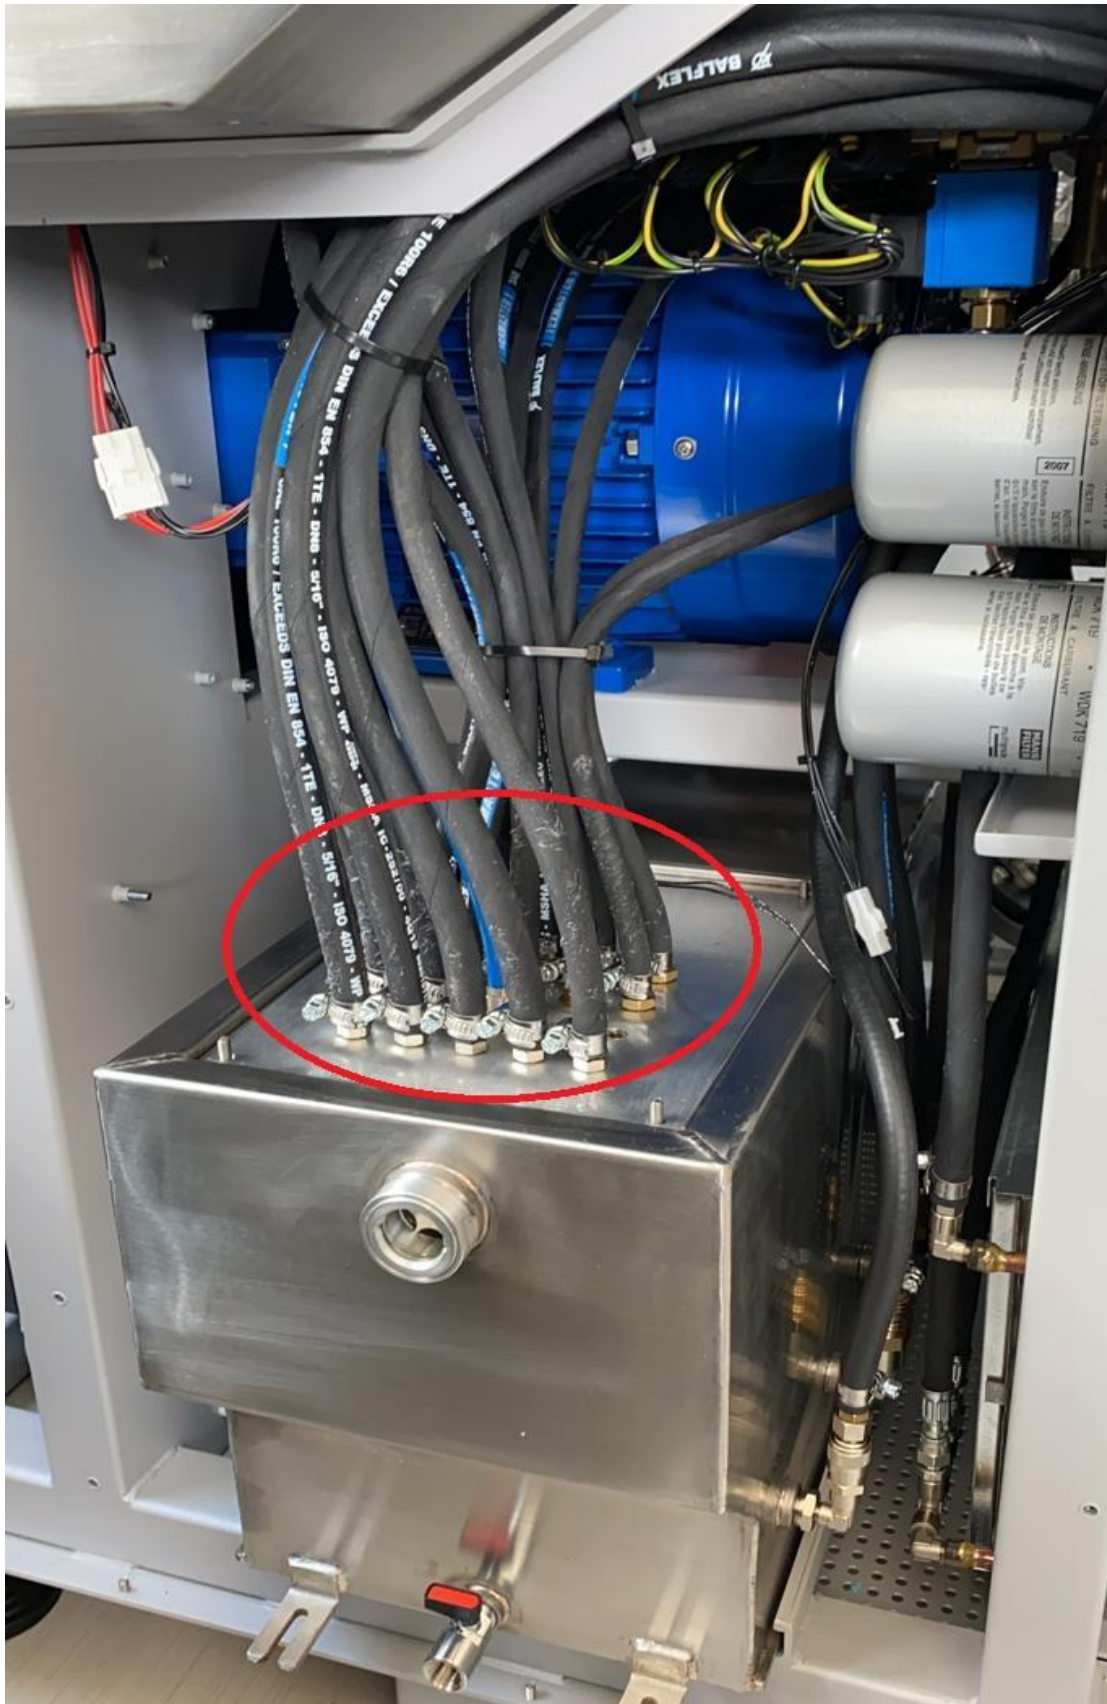

Remove the liquid from the tank.

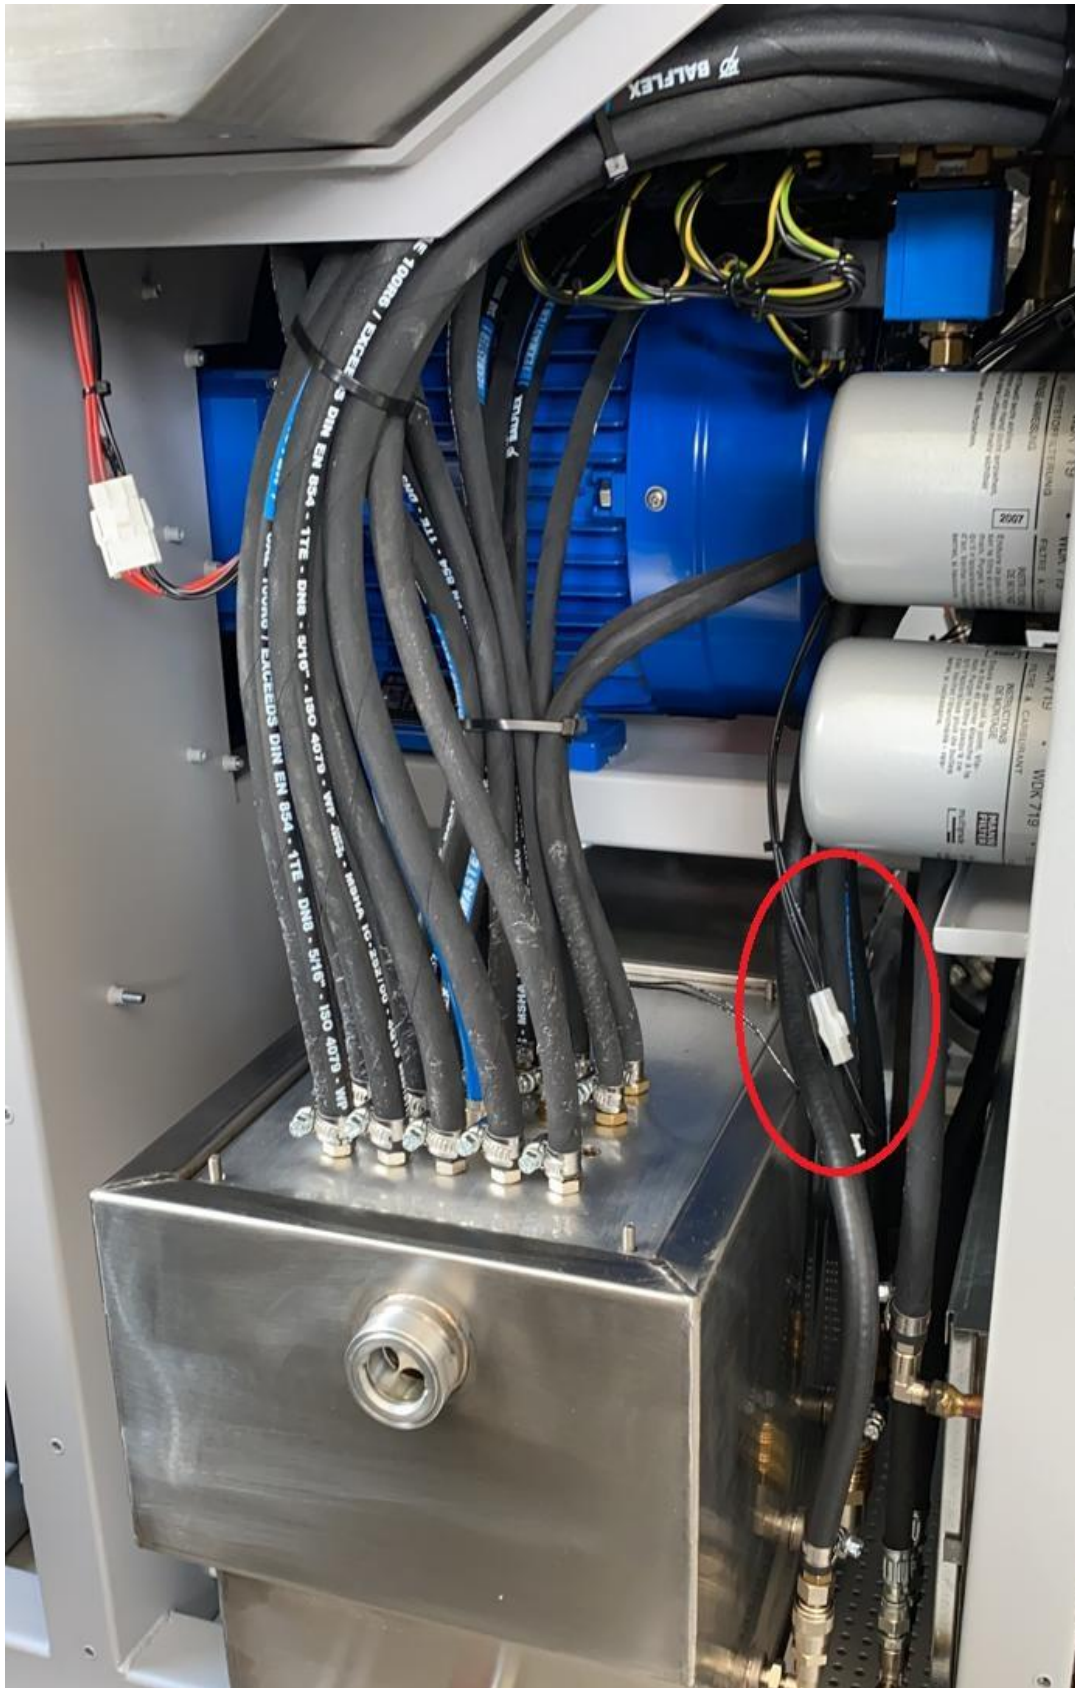

Step 3:

Disconnect all Hoses and connectors the right and upside and remove the old tank.

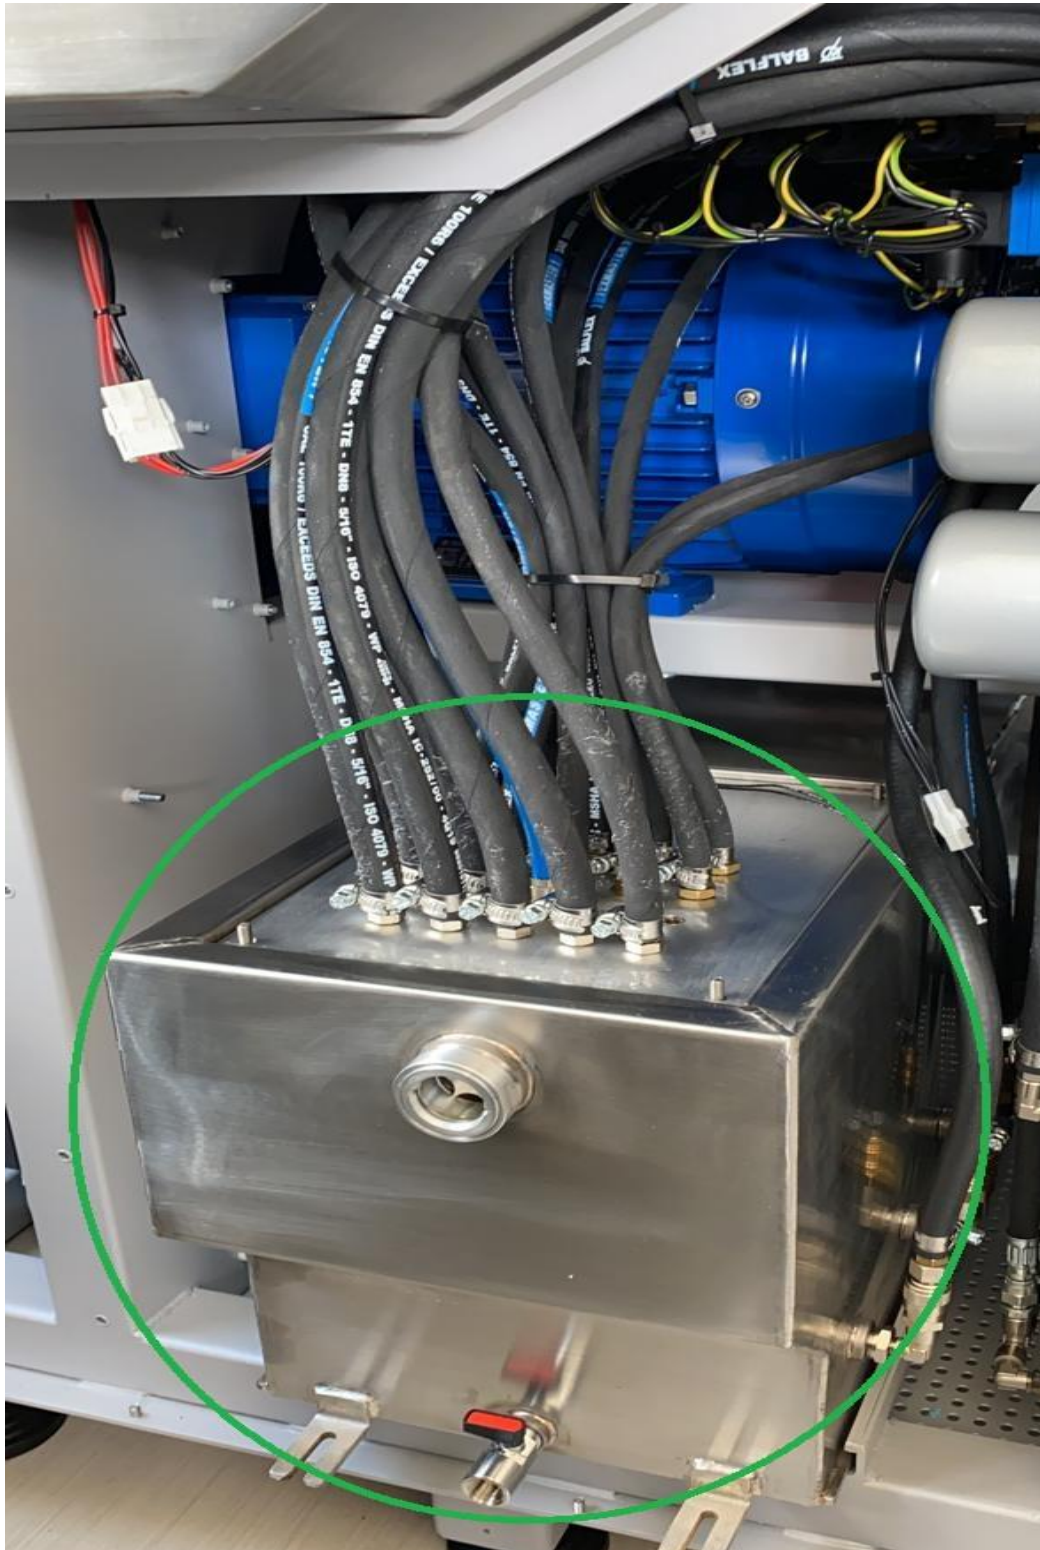

Step 4:

Connect the new heater tank and all the hoses to the new tank properly.

Step 5:

Manual set up Temperature. Left side you see arrow. The dot is the set position.

Step 6:

Plug it into a 10 Ampere Fuse Socket.

Step 6:

Screw or glue the Switch Board.

Step 7:

The Switch Board is already set at 35 degrees.

Indicator Lights.

BLUE: Power ON (main Fuse)

RED: Overheat (manual Temperature) Check Step.5

YELLOW: Standby (when we reach the desired temperature)

GREEN: Heating Mode ON

If you want change or set up by yourself, please follow the Instruction AC1-27.
